

Aerial Work Platform

Aerial Work Platforms - There are numerous accessories meant for forklifts that could be used so as to help expand the capabilities of your lift truck and allow you to carry items, handle materials with less effort or to complete clean-up jobs.

Several of the attachments are specifically designed to fit on the blades themselves. Blade extensions for example, are utilized when you require much more fork length, that increases lifting capacity. Blade extensions come in lengths varying from 48-120 inches. Rounded or triangular accessories are another type utilized if transferring rolled material in order to ensure it does not roll off of the standard flat blades.

Lifting accessories can be pivoting and telescoping crane accessories. They come in many kinds. These attachments are often intended for transferring poles, lumber, metal bars or any sort of bulky stuff. Other accessories like different styles of hooks and hook plates are obtainable so as to pick up items with a chain or sling. Magnetic lifters and slab lifters are other stuff which can be used together with hook accessories. Slab lifters are specialized accessories that are meant for picking up a variety of materials that are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools which connect to your forklift to make moving rolls of carpet easier. The accessory hooks onto the lift truck's blades and has a pole that goes through the middle of the carpet roll.

There are several kinds of lift truck attachment utilized for facility maintenance such as snow forks. These industrial forks could be attached to front end loaders and meant for moving materials like for instance dirt, and mulch as well as snow. Other common cleanup attachments consist of magnetic sweepers and standard sweepers. Standard sweepers consist of a broom which the forklift forks hook onto for sweeping big spaces such as factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal debris like on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up quick and easy.

Material spreaders are other attachments utilized on lift trucks. These spreaders are helpful for various applications like spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting accessory that numerous companies utilize day by day. The platforms range in size from 36" x 36" to up to 60" x 60". There are several units accessible which are capable of folding up and storing into a smaller space. Work platforms are designed to raise staff up to an overhead location using the lift truck. Larger platform models have extra space for staff so as to bring tools and other essential items intended for the task. Often work platforms are made of poly material or steel.
